Trade-List of

Lovett's Nursery Little Silver, New Jersey

Alida Lovett. A climbing variety

## World's Largest Growers of Privet

OOVETT'S NURSERY is located one mile from Little Silver depot, two miles from Red Bank, forty miles from New York City, and five miles from Long Branch. To reach it from NEW YORK CITY, take the Central Railroad of New Jersey (foot of Liberty Street or 23d Street), or the Pennsylvania Railroad (Cortlandt Street, or 32d Street and 7th Avenue). From PHILADELPHIA take the Pennsylvania Railroad (Broad and Market Streets), or the Philadelphia and Reading Railroad (Bound Brook Route). In all cases get tickets to LITTLE SILVER; good on either road.

Telephone No. 1475 Red Bank

We have a full quarter-million splendid, heavy, transplanted plants of Berberis Thunbergi in stock

## TRADE-LIST

## OF

# Lovett's Nursery 

Little Silver, New Jersey

SPRING, 1927

## TERMS AND CONDITIONS OF SALE

SPECIAL NOTICE. We exercise the greatest care to keep our stock clean and true to name. Should any be otherwise, we will return the money paid or replace it with other stock, but beyond this we are not liable for damage. A sure indication of the purity of our stock is that our customers continue to deal with us year after year. A Certificate of Inspection is attached to each shipment.

PRICES in this Trade-List apply to orders placed only by nurserymen, florists, or dealers. Items offered in our Retail Catalogue for spring 1927 (Catalogue No. 120), but not offered in this Trade-List, will be supplied to the Trade at a discount of 20 per cent from the each, dozen, and 100 rates quoted in the Retail Catalogue.

Not less than 5 of a variety will be supplied at the 10 rate, not less than 50 of a variety at the 100 rate, and not less than 500 of a variety at the 1,000 rate.

PACKING. AII goods are carefully packed in boxes or bales, for which we charge the cost of material only. Please make it clear in your order whether goods are to be shipped by freight or express, and name route. After delivery to forwarders, aII articles travel at the risk of the purchaser, and if Ioss or delay occurs, the forwarders alone are responsible. We deliver all goods to the express office or freight depot at Little Silver or Red Bank without cartage charges. When ordering stock shipped by express C. O. D., please remit one-quarter the amount of the purchase price.

CLAIMS, if made upon receipt of goods, will be carefully and cheerfully examined, and adjusted. Claims made fifteen days after receipt of goods will not be entertained.

TERMS. We offer the usual terms to those of known responsibility, but must have satisfactory business references from others, or cash with order. Please use printed stationery or enclose business card.

## EVERBLOOMING ROSES

## HYBRID TEAS AND TEAS

Roses have such a strong appeal to all classes of people, for so many different reasons, that the market for them is unlimited. It is simply a proposition of supplying them dependable varieties in properly grown, high-grade stock. Give people good roses, and they will demand more; give them poor roses, and you lose them as customers. Either they become disgusted with roses or buy elsewhere.

Obviously, nurserymen should obtain the best possible stock, well-grown, well-graded, and properly handled. Every year there is a serious shortage of desirable kinds, and particular nurserymen find it difficult to secure a sufficient supply of first-rate plants.

Lovett's Roses are the solution of this problem. Plants of absolutely first-grade quality, carefully chosen varieties, handled with the skill of Iong experience, they satisfy all requirements of the most exacting purchasers.
B. indicates that the plants are budded.
O.R. indicates that the plants are growing on their own roots.

Prices quoted are for strictly first-grade plants, f. o. b. Little Silver, N. J. We can supply limited quantities of most varieties in a medium grade at 10 cents less per plant than we ask for the heavier grade.

## POLYANTHAS

These dwarf varieties bloom more than any other kinds. They are especially good for edging. The flowers are small and are produced in immense bunches.

> Strong, two-year, No. 1, field-grown plants
> $\$ 3.50$ for $10 ; \$ 30$ per 100

Baby Dorothy. B. Pink.
Baby Rambler. B. Red.
Cecile Brunner. O.R. Light pink
Erna Teschendorff. B. Crimson.
Eugene Lamesch. B. Orange-yellow.
George Elger. O.R. Soft y ellow.
Gruss an Aachen. O.R. Pink and salmon-y ellow. A splendid variety.
Orleans. B. Bright red; white center.

## HYBRID PERPETUALS

These are the big-flowered, gorgeous Roses of the North. They bloom in June and again in the autumn; a few flower all summer. They are much hardier than the true everblooming varieties.

Strong, two-year, No. 1, field-grown plants $\$ 3.50$ for 10 ; $\$ 30$ per 100
Alfred Colomb. B. Carmine-crimson.
Anna de Diesbach. B. Light crimson.
Captain Christy. O.R. Silvery pink.
Coquette des Alpes. B. White.
Frau Karl Druschki. B. Snow-white.
General Jacqueminot. B. Bright-red.
George Dickson. B. Velvety scarlet.
Heinrich Münch. B. Soft light pink.
His Majesty. B. Rich crimson.
J. B. Clark. B. Light red.

Magna Charta. O.R. and B. Glowing pink.
Mme. Gabriel Luizet. B. Light rose-pink.
Marshall P. Wilder. B. Deep crimson.
Prince Camille de Rohan. B. Dark maroon.
Paul Neyron. B. Rich rose-pink.
Soleil d'Or B. Orange-red and yellow.
Ulrich Brunner. B. Light crimson.

## MOSS ROSES

We continue to grow a representative Collection of these famous, well-liked, old-time Roses. There are always inquiries for them. They bloom only once each season.

> Strong, two-year, No. 1, field-grown plants
> $\$ 3.50$ for $10 ; \$ 30$ per 100

Crested Moss. B. Bright rose, with a great mossy hood.
Henri Martin. B. The best red of this type.
Salet. B. Bright rosy pink.
White Bath. B. A fine white.

## RUGOSAS AND OTHERS

Strong, hedge or big-bush types. They are mostly constant-blooming and are extremely hardy.

## Strong, two-year, No. 1, field-grown plants $\$ 3.50$ for 10 ; $\$ 30$ per 100

Conrad Ferdinand Meyer. B. Light pink.
F. J. Grootendorst. O.R. and B. Crimson; clusterflowered.
New Century. B. Silvery pink.
Persian Yellow. B. Bright yellow; double flowers. Sir Thomas Lipton. B. Pure white.

Dorothy Perkins Climbing Rose

## HARDY CLIMBING AND TRAILING ROSES

We have made a specialty of Hardy Climbers and our stock is strong and healthy.

We especially recommend Mary Wallace, the famous Rose from the U. S. Department of Agriculture which has made such a phenomenal success, and its three older sisters from the hand of the noted Dr. Van Fleet, Alida Lovett, Bess Lovett, and Mary Lovett. These belong to the now definitely established class of large-flowered Hardy Climbers which is so rapidly displacing the old-fashioned, bunch-flowered type, like Crimson Rambler and Dorothy Perkins.

Strictly No. 1 grade, field-grown plants at prices given. If wanted we can supply a limited number of medium-grade plants of most varieties at $30 \%$ less per plant.
Alida Lovett. The best large-flow- 10100

## HARDY SHRUBS DECIDUOUS AND EVERGREEN

The lack of adequate planting about the homes in cities, and in small towns especially, is pitiable. There is a crying need for good, energetic salesmanship to get these barren places planted. Hardy Shrubs, of course, are the things to sell because of their quick, easy growth and their extreme beauty of flower, form, and foliage.

Our stock is exceptionally well chosen and is strictly first grade. This list includes only those items which we carry in great quantity. We grow many other plants of this type in smaller quantities, and we will gladly quote prices on such items as you may need.
ACER palmatum (polymorphum). 10 Green Japanese Maple.

## FORSYTHIAS

We do not believe any shrubs are more appreciated than Forsythias, with their early, spring cheer-the very first of the common shrubs to break definitely through the bonds of winter.

Use them as strong points in landscape planting, in bold corner masses, as specimens. Everybody likes them and wants them.

| IIA Fortunei. | 10 | 100 |

## HYDRANGEAS

In spite of the millions of Hydrangeas P. G. which have been planted over the world, there is still an insatiable demand for them. Our stock is extensive and good. But there are other Hydrangeas less common, and much more beautiful. Try a lot of Arborescens, or just the straight Paniculata. It is well to have variety. It makes good business.

```

Privet Hedge

## DECIDUOUS AND EVERGREEN SHRUBS, continued

## Ligustrum - The Privets

All good hedge plants. We grow them in immense quantities.

## Ibolium Privet

## The Sensational New Hardy Privet

This is new. A blending of the habit and attractive foliage of the common California Privet with the greater hardiness of Ligustrum Ibota. Very desirable for all purposes, and especially where winters are severe. Try it for general all-round satisfaction where California Privet is damaged by the winter. It is good stuff.

## Lonicera - Honeysuckle

The variable forms and the exquisite delicacy of flowers, foliage, and fruits of the many species of Lonicera are never-ending wonders. Often the shrubs are overlooked because they are confused with the common Honeysuckle vine; but they deserve to be much better known and to be pushed vigorously.

[^0]
## DECIDUOUS AND EVERGREEN SHRUBS, continued

## Philadelphus

Any enterprising nurseryman can capitalize the sentimental value of the old-fashioned " Sweet Syringa" and sell great quantities of them. And he would be perfectly justified because of their handsome growth, great utility for masses and screens as well as the beauty and fragrance of their flowers. We have a splendid stock of Pbiladelphus coronarius and other valuable sorts.

## HARDY VINES AND CREEPERS

Think of the thousands of factory walls, the chimneys, the rows of bare houses in the cities that are crying out for Boston Ivy to clothe their nakedness! Think of the thousands of porches and pergolas, the verandas and balconies that need myriads of honeysuckIe, wistaria, and clematis to make them habitable!

The market is ready. We have the stock. Let's go!

## EVERGREEN TREES

Landscape architects and the landscape departments of most nurseries would go bankrupt, both mentally and financially, if there were no Coniferous Evergreens! 'They are the first resort and the last hope for aII groupings and formal plantings, especially when quick, home-like effects are desired. The demand for them is enormous and insatiable, and few things are more profitable if properly handled.

Our trees are well-grown, frequently transplanted to insure good roots, and are shipped with balls of earth encased in burlap.

Perennial Planting

## HARDY PERENNIAL PLANTS

To supply a complete line of hardy garden flowers in well-grown, well-handled plants that will give pleasure and satisfaction to customers is the most difficult department of the retail nurseryman's business. It is extremely important, therefore, to have a source of supply which is constant and can be depended upon to furnish a wide range of good stock.

We pride ourselves on the quality and diversity of the Hardy Perennials which we raise. We make a specialty of them, and how to handle them in such a way that they retain their fuIl measure of vigor and vitality.

Strong, field-grown plants unless otherwise noted

## GARDEN ROOTS

These are necessary items, often demanded in quantity, for which reason we maintain an unusually large and vigorous supply.
ASPARAGUS. We invite special attention to our Iarge and splendid supply of Asparagus roots. We
have specialized in growing one variety-Washington-because of its decided points of superiority over the old varieties. A fine heavy bearer, does not rust, of highest quality and commands top prices.

## STRAWBERRIES

For description of the different varieties offered in this Trade-List, see our retail Catalogue No. 120.
We specialize in the production of Strawberries, and never, in the history of our business, have we had a finer supply than we have this year. Each season we pot approximately a half million plants, and we especially recommend these pot-grown plants for spring planting, in preference to layers. Their extra vigor more than equalizes the difference in cost.

The layer plants we offer are well rooted, well developed, and are tied in bunches of 25 . They are recommended for large or commercial plantings.

A thrifty Grape-vine

## GRAPES

More and more Grapes are planted every year. Enterprising nurserymen are quick to seize this opportunity to seII good stock profitably.

We specialize in the production of Grape-vines, having at this time a supply of approximately 300,000 vines, exceedingly fine in both root and top.

## PEACHES

Trees, 4 to 6 feet, as follows:

| Celle of Georgia | Elberta |
| :--- | :--- |
| Carmen | J.H. Hale |
| Crawford's Early | Hiley |
| Iron Mountain | Rochester |

$\$ 2.50$ for $10, \$ 20$ per 100
Also 3 to 4 -ft. trees, $\$ 2$ for $10, \$ 15$ per $100 ; 2$ to 3 ft . trees, $\$ 1.50$ for $10, \$ 10$ per 100

## NEW VARIETIES

The following new Peaches originated at the New Jersey Department of Agricultural Experiment Station. They have been tested widely, and pronounced good. We offer them for the first time this spring.
Cumberland. A white-fleshed semi-freestone Peach and the earliest of really high quality to mature its fruit. It ripens several days earlier than Carmen, and is far superior to that variety in quality, general appearance, and resistance to rot.
Eclipse. A yellow-fleshed second early freestone variety of high quality. Should prove most profitable commercially because of its season and its firm, yellow, high-flavored flesh.
Radiance. A seedling of Beile of Georgia, crossed with Greensboro. Ripens a few days after Cumberland. It resembles Belle of Georgia in shape, size, and general appearance, so might be considered an early fruiting form of that variety.
All grades at 10 cts. per tree above prices quoted above on standard varieties

## PLUMS

First class trees, as follows:

| Abundance | Monarch |
| :--- | :--- |
| Bradshaw | Moore's Arctic |
| Burbank | Reine Claude |
| Grand Duke | Yellow Egg |
| Lombard |  |

Lombard

## $\$ 4$ for $10, \$ 35$ per 100

## THREE VERY HARDY PLUMS

Loring. Fruit of good size and handsome deep red color when ripe. Tender, juicy flesh.
Sapa. A new Cherry-Plum hybrid. Has rich purple juice and deep wine-red flesh. Ripens early, is a heavy bearer, and the trees bear when young.
Waneta. A heavy annual bearer with handsome dark red fruits. Flesh of firmest texture, yellow, and of delightfully sweet flavor.
$\$ 5$ for $10, \$ 45$ per 100
CHERRIES
Extra-selected trees, as follows:

| Black Tartarian | Napoleon |
| :--- | :--- |
| Early Richmond | Rockport |
| Gov. Wood | Schmidt's Bigarreau |
